Subject: Application for Senior Automation / Telecom Leadership Role

Dear Hiring Manager,

I am writing to express my interest in senior-level opportunities in **telecom automation, cloud operations, and service delivery**. With over **17 years of experience** working across leading organizations such as **Ericsson, Huawei, and Nokia**, I bring strong expertise in multi-generation mobile networks (2G–5G), large-scale automation initiatives, and service transformation.

In my current role as an **Automation SME at Ericsson**, I have designed and delivered end-to-end automation solutions that significantly reduced manual effort and improved operational efficiency. I have been actively involved in feasibility analysis, solution design, governance (AMB/IPM), and end-to-end delivery, while supporting global teams in driving automation at scale. My work has consistently focused on creating business-impact-driven solutions rather than tool-based automation alone.

I have hands-on experience with Power Automate, RPA, VBA, and cloud platforms such as AWS, along with a strong understanding of telecom operations and service assurance. I am certified in AWS, ITIL, Scrum, and PRINCE2, which helps me effectively bridge the gap between technical execution and structured delivery in complex, cross-functional environments.

I am particularly interested in opportunities where I can contribute to strategic automation, cloud-enabled operations, and continuous service improvement, while mentoring teams and driving long-term value for the organization.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience and skills can contribute to your team's success.

Warm regards,

Anubhav Tripathi
